## Values

Lead and be a benchmark in solutions that expand the possibilities in opening paths with innovation and security, in the continuous search for new horizons

# OUR PRODUCTS & SERVICES

Parking Management & Guidance Systems

---

Gate Automation Garage Door And Road Barriers

---

Smart Home Automation

---

CCTV, Access Control System

---

Burglar Alarms

---

Intercom Systems

## Roller Type Automatic Door Opener

### Application

Widely Applicable To Iron Doors And Craft Doors In Villas And Factories, Achieving Automatic Opening, Bidding Farewell To Traditional Manual Opening, Saving Time And Effort.

### Product Characteristics

Can Connect To Mobile Apps To Enable Mobile Activation Can Be Used During Power Outage, Automatically Switching Battery Power Supply Can Connect Card Readers And Fingerprint Machines Automatically Stop When Encountering Obstacles When Opening The Door

## Motors For Swing Gates

## Motors for Sliding Gates

# "Smart Parking + Pedestrian" Full Access Control Solution

## Find your car system

- Parking guidance function
- Find your car function
- CCTV function

City Level Parking Platform

## Parking Guidance System

- Multi-level guide screen
- Various parking detectors
- Parking navigation

## On-Street Parking System

- Various detection methods
- Diverse charging rules

## Pedestrian System

- High-security management
- Large-capacity face database
- Adaptation to complex scenarios
- 1:N face comparison

## Parking Management System

- Ticketless based
- Various charge rules
- Mobile payment
- 24/7 operation

## Indoor Parking Guidance System

Drivers receive guidance via Indoor LED display, parking sensors indicate occupancy with Green/Red colors and data syncs to Entry LED display, creating a closed-loop system for directing vehicles to indoor parking spaces.

## Outdoor Parking Guidance System

Depends on difference outdoor parking environment, KEYTOP offer Tailored parking sensor for parking data collection and guidance

## Key Products, Flexible Choices
